

## PROFILE SUMMARY

---

- Over 7 years of software industry experience in web platform implementations and secure module application development.
- Extensive knowledge in Front-End web development, Product Management Lifecycle, Agile Methodology and Process Mapping.
- Working experience in Cloud Computing, Gaming, Telecommunication and Mining industries as a Lead Software Developer and Scrum Master.

## SKILL SET

---

### Programming/Computer Skills

Typescript, ReactJS, Redux, CSS3, Bootstrap, ASP.NET, Nodejs, J2EE, JSP, HTML, PL/SQL, JDBC, Web Services, Jest, Selenium WebDriver, Automation Testing (QTP), MS Visio, HP QC, Command in SDLC methodologies

### Certifications

- Certified Scrum Master
- Microsoft Certified Application Developer (MCAD) in .NET
- International Software Testing Qualification Board (ISTQB K4)
- Migration from IPV6 to IPV7

## PROFESSIONAL EXPERIENCE

---

**Chan Zuckerberg Initiative**, San Francisco, USA (Contract)  
Software Engineer

January 2021 – Present Senior

- Migrated a react application from JavaScript project to Typescript.
- Lead a team of 12 developer and help them onboard and get in speed with Typescript.
- Experience with docker and AWS.
- Implemented functional components.
- Used technologies like React, Redux, Babel, Webpack, eslint.
- Took responsibility and lead the project from planning phase to production phase.
- Trained the team on getting up to speed with Typescript.

**Lifesize**, New Brunswick, Canada.  
*Senior Software Developer*

March 2019 – November 2020

- Developed software for customer care services to provide a multichannel contact center using AWS.
- Translated design team's UX wireframes and mockups into responsive, interactive features, using HTML/CSS and ReactJS.

- Worked on fixing bugs using AngularJS, ReactJS, Clojure.
- Created and maintained the solution vision, roadmap, and backlog of work through the project's life cycle.
- Worked closely with internal developers and external vendors, stakeholders to ensure all the dependencies, impediments are understood for high performance of the team.
- Lead project meeting for sprint planning, demos, sprint retro and daily stand ups.
- Managed, trained, and mentored a team of 5 junior software developers.

**Atlantic lottery Corporation**, New Brunswick, Canada  
*Web developer (Adobe Experience Manager)*

March 2016 – March 2019

- Design and develop web application using Adobe platform.
- Developed guidance of site structure, components, templets, workflows, dialogs, object model designs (Java APIs) and unit testing using AEM architecture.
- Hands on experience with google Analytics to help marketing, Campaign and other internal endpoints.
- Worked with technologies like REACT, JAVA SCRIPT, HTML #5, JAVA, NODE JS, KNOCKOUT JS, ANJULAR JS, SDK and LESS.
- Designed websites for ILottery and Sports betting project, was a front-end developer for the project.
- Create templets for vendors using pug templets.
- Create iframes to display 3<sup>rd</sup> party data on the website.
- Provided enhancements and level 1 production support.

**Computer Science Corporation**, Hyderabad, India  
*Business Associate (Sr. Software design)*

September 2014 – March 2016

- Designed and developed high performance, user friendly, multi-tier web applications utilizing .NET technologies such as ASP.NET, SQL Server and Entity Framework.
- Provide enhancements, maintenance, test and support to a .NET based multi-threaded Risk Calculation Application (RCA), implementing GUI, batch, and GRID computing functionalities.
- Analyzed and provided enhancements for legacy VB6/ASP application code, re-using legacy DLLs when possible.
- Create and modify stored procedures and generate corresponding .NET proxy classes along with Bug fixing and Enhancements of various .NET Web pages.
- Responsible for understanding the requirements and developing web-services and services documentation from a services consumption perspective and providing support for existing web services. • Provided level 3 production support, resolved issues promptly and dealt with clients properly.

- Developed functional test scenarios, unit test cases, system requirement test cases and regression test cases.

**Digit Secure India PVT Limited, Hyderabad, India**

May 2013 – July 2014

*Programmer Analyst*

- Coordinated with the customers for business process analysis and understanding technical & functional specifications.
- Developed secure modules for user population using web technologies such as HTML, JavaScript (AJAX & jQuery), CSS and web services.
- Developed the front end using HTML5, CSS3, JSP, JavaScript and JQuery. Used JDBC template to connect the backend servers.
- Designed the databases and created queries and procedures for development and testing using MySQL and SQL Server.
- Configure Java security and deploy components to the application servers such as JBOSS 6.

## **EDUCATION**

**Jawaharlal Nehru Technological University, India**

Aug 2010 - May 2014

*Bachelor of Engineering- Electronics and Communications*

GPA: (3.7 / 4.0)
